Community Population Improvement: Lessons Learned in Real Time

FEATURED WEBINAR

Redefining Population Health

Measuring risk and outcomes requires expanding the data beyond clinical outcomes and claims to include social and environmental determinants of health.

In this blog post, Jason Gilder, PhD, Senior Director of Analytics and Informatics, IBM Watson Health, shares challenges, opportunities, and lessons learned during his experience partnering with Duke Health to build out a strategy for improving the health of a community – involving care delivery stakeholders, community partners, and the citizens themselves.
