Affinity Groups

Analytics

Affinity Groups are intimate forums focused on a shared issue, topic or the collective challenges of its members. The goal is to share similar concerns, best practices, lessons learned, industry trends and resources to help their organizations thrive.

From CDS to PX and beyond

The Analytics Affinity Group regularly convenes 25-30 Chief Analytics Officers and other executives for calls and Summits. Discussion topics address a variety of analytics topics from identification of at-risk populations and clinical decision support for personalized medicine to Amazon-like patient engagement and new business models.

Register to be Invited

Please create an SI profile – takes just 2 minutes and you’ll gain access to member-only content and events. When you create a profile, you indicate your topics of interest (such as Analytics) and that will make sure you are informed about SI events and news that interests you most.
