

## Kerri L. Webster, RN, MS CPHIMSS

Kerri Webster is a seasoned healthcare leader with more than thirty years of healthcare experience that spans the bedside and operational areas. Since 2002 she has served as a Director of Information Technology for Centura Health - Colorado's largest health system operating seventeen hospitals, senior living communities and Flight for Life, the nation's first hospital-based medical helicopter program. In this role, Kerri oversees the Enterprise application team - responsible for support of over 100 applications, the software development team, the Business Intelligence team and IT operations for local hospital staff.

Ms. Webster received a bachelor of science nursing from Wichita State University, Wichita Kansas, and a master of clinical informatics from University of Colorado.

She is married to Paul Webster and they have two grown children.
