

## **Janice Wurz**

Ms. Wurz has 30 years of management experience in health care, information systems and public relations with proven competence in analytics, accountable care preparation, legacy data archiving, change management, project management, system selection and implementation. As a lead for Impact Advisors' Analytics, Population Health and Interoperability practice, Ms. Wurz provides clients with data management and strategic planning including support for DSRIP preparation, clinician reporting, and market research.

Her breadth of experience includes IT leadership responsible for health information exchange; physician integration; and clinical, internal and public portals as well as leadership development. She actively contributes to the industry with various journal articles and blog posts, as a HIMSS leader, and through presentations on analytics, legacy data management, and other hot topics.
