[Real-Life Patient and Community Engagement through Technology at Atrium Health](#)

[Combining Physician Engagement, Data Integration and Payor Partnerships](#)

## Employee Health Affinity Group

SI Affinity Groups are intimate forums focused on a common issue, topic or collective challenge of its members, with a goal of information sharing around similar concerns, best practices, lessons learned, industry trends and resources to help organizations thrive.

### Creating a Culture of Wellness

The Employee Health (EH) Affinity Group welcomes the many executives who are accountable for improving healthcare for everyone. EH encompasses the broad range of strategies, activities and expertise required under value-based care (including new care and business models driven by risk-based contracting).

Via Dialogue calls and in-person and virtual Summits, the **SI EH Affinity Group** offers leaders a forum to innovate and share solutions that ensure healthcare solutions cross social, financial, work-based and geographical boundary lines. There ultimately will be an **SI EH Affinity Group MS Teams Site** to facilitate ongoing, ad hoc, open discussion and collaboration among the EH peer group.

---

***“What is unique about SI is they bring executives together to talk about what really works, what doesn’t, and why. That results in a very unique learning experience for our team.” – Paul T. Brown, Henry Ford Health System***

---

### Register for Your Invite

Please take two minutes to [create an SI profile](#) to gain access to these **member-only** events and content. You get to specify which topics are of most interest to you, thereby customizing your notifications and news to fit your busy schedule.

### For More Information

To participate or guest-lead one of our future calls, please contact Affinity Group Director **Cynthia Schroers** ([cschroers@scottsdaleinstitute.org](mailto:cschroers@scottsdaleinstitute.org)) to share topics for discussion. Some hosts share background materials to support discussion; just ask for samples.
